

AD _____

Award Number: DAMD17-95-2-5012

TITLE: Postdoctoral Research Associateship Program with USAMRMC

PRINCIPAL INVESTIGATOR: Judith Nyquist, Ph.D.

CONTRACTING ORGANIZATION: National Academy of Sciences
Washington, DC 20418

REPORT DATE: February 2003

TYPE OF REPORT: Final

PREPARED FOR: U.S. Army Medical Research and Materiel Command
Fort Detrick, Maryland 21702-5012

DISTRIBUTION STATEMENT: Approved for Public Release;
Distribution Unlimited

The views, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy or decision unless so designated by other documentation.

THE NATIONAL ACADEMIES

Advisers to the Nation on Science, Engineering, and Medicine

National Research Council RESEARCH ASSOCIATESHIP PROGRAM

with the

**U.S. Army Medical Research Materiel Command
(AMRMC)**

Contract number: DAMD17-95-2-5012

Publicity

The National Academies Research Associateship Programs for the report period were announced to the scientific community in the fall of the preceding year, 2001. Publicity materials describing the National Research Council-U.S. Army Medical Research Materiel Command (AMRMC). Programs were distributed in November to presidents, graduate deans, and heads of appropriate science and engineering departments and minority-affairs offices of all academic degree-granting institutions in the United States. An e-mail announcement of the programs was sent to these same contact points prior to each review deadline. Promotional materials were sent to Laboratory Program Representatives, Associateship Advisers, and other interested persons. General advertisements of programs were placed in leading scientific and engineering publications. Publicity materials and other related information were made available on the internet. Research Associateship Programs staff attended numerous society meetings and minority recruitments to promote the various programs and meet with prospective applicants throughout the year.

Requests

Application materials were distributed in response to specific requests for information about the AMRMC Research Associateship Program or as a result of general requests by persons whose fields of specialization appeared to be appropriate for the research opportunities available in the AMRMC laboratories.

Competition

Panel reviews of applicants for the Research Associateship Programs, including those with the U.S. Army Medical Research Materiel Command, are conducted in winter, spring, summer, autumn of each year. The following is a breakdown of the action taken with the applications during the report period.

	review-year <u>winter -02</u>	<u>autumn- 02</u>	<u>spring- 03</u>	<u>TOTAL</u>
TOTAL APPLICATIONS				
Number of Applications Reviewed	4	12	12	28
Applications not recommended (did not pass Review)	2	1	1	4
Applications Recommended (passed Review)	2	11	11	24
Awards offered	0	9	0	9
Awards accepted	0	5	0	5
Awards declined	0	3	0	3
Awards withdrawn by RAP (NRC officially withdrew award <i>after</i> it had been accepted.)	0	1	0	1

Associates' Citizenship

Associates on tenure between 10/1/2002 and 2/28/2003 were citizens or Permanent Residents of the United States and the following countries:

2 Australia	1 Italy
1 Bangladesh	3 People's Republic of China
1 Denmark	1 Poland
1 Hungary	4 Russia
4 India	1 Ukraine
1 Israel	25 United States

Associates' Activities

Associates who ended tenure during the report period were on tenure for an average of **29** months, ranging from **24** months to **39** months.

Of the **5** Associates who ended tenure during the report period, **4 (80%)** submitted final reports. In the final reports, Associates indicated the following scholarly activity while on tenure.

7 Articles published in refereed journals	4 International presentations
1 Patent applications	10 Domestic presentations
	1 Awards

After ending their tenure, Associates indicated their future plans as follows:

2 Remain at host agency as perm. employee	- Research/teaching-foreign college/university
- Remain at host agency as contract employee	- Research/admin in industry
- Research position at other US gov't. lab	- Research/admin in non-profit organization
- Administrative position at US gov't. lab	- Postdoctoral research
- Research position at foreign gov't. lab	1 Self employed
- Research/teaching-US college/university	1 Other (may include unemployed)

In their final reports, Associates were asked to evaluate certain aspects of their experiences on a scale of 1 (low) to 10 (high). The average rating for each item follows:

-	<i>Short-term value:</i>	Development of knowledge, skills, and research productivity
-	<i>Long-term value:</i>	How your Research Associateship affected your career to date
8.5	<i>Laboratory:</i>	Quality of the support you received from the federal laboratory
9.8	<i>RAP:</i>	Quality of the support you received from the Research Associateship Programs

Advisers also were asked to complete an evaluation of the Associate. The following summarizes the Adviser evaluations for Associates ending tenure during the report period. Of the **5** Associates who ended tenure, **2 (40%)** Adviser evaluations were completed. Assessments were made on six criteria using the following rating scale: 1-below average, 2-average, 3-above average, 4-good, and 5-outstanding/exceptional. The average rating for each item follows:

3.0 Knowledge of field	3.0 Independence
3.0 Innovative thinking	3.0 Motivation
2.5 Research techniques	3.0 Overall scientific ability

The Adviser was asked, "Would you like this Associate as a professional colleague?" The Advisers responded in the following manner:

1	Yes	-	No Comment
1	No	-	No Answer

Additional information about the Associates' activities can be found in the attachments described below and the Appendix.

Attachment 1: Associates who were on tenure between **10/1/2002** and **2/28/2003**. Included are the Associate's laboratory center/division location, the starting and termination dates, and the names of their advisers. For those Associates who ended tenure during the report period, it is noted if the final and adviser evaluation reports have been received. Associates are required to submit final reports upon termination of tenure, and advisers are asked to submit a final evaluation of each Associate. Associates who have not submitted a final report have received follow-up correspondence.

Attachment 2: All recommended candidates by category (e.g., Recommended, Accepted, No Funding, Declined, etc.). This report includes information about citizenship, Ph.D. institution, title of proposed research, proposed or actual starting date, and adviser.

Attachment 3: Summaries of Associate patent activity, if any, and Associate research during tenure as reported on the Associates' termination reports. The summary of patent activity includes the patent application title, inventor(s), and date of application.

Appendix: Final reports received from the Associates who ended tenure during the report period.

Diseases

October 2002

1- Recommended

RHOADES, ELIZABETH R
Citizenship: United States
Adviser: Dr. Sina Bavari
Research Field: Immunology
Research Title: Identification of Human MHC Class II-Restricted Epitopes of the Protective antigen (PA) and Novel Correlates of Immunity

Ph.D. Date: 1997
Colorado State University

A- Accepted Award (2 Applicants listed)

FRITZ, ELIZABETH A
Citizenship: United States
Adviser: Dr. Peter B. Jahrling
Research Field: Virology
Research Title: Modulation of the Immune Response During Smallpox and Monkeypox Infections

Ph.D. Date: 2002
Rush University/IL
Actual Starting Date: 3/03/03
Termination Date: 3/02/04

KELLER, MICHAEL A
Citizenship: United States
Adviser: Dr. Alan L. Schmaljohn
Research Field: Virology
Research Title: Therapeutic Targeting of Filovirus RNA-Dependent RNA Polymerase

Ph.D. Date: 2002
Wake Forest University/NC
Actual Starting Date: 12/09/02
Termination Date: 12/08/03

8- Declined (3 Applicants listed)

ELLISON, MICHAEL A
Citizenship: United States
Adviser: Dr. Leonard A. Smith
Research Field: Biochemistry
Research Title: Development of Vaccines Against Botulinum Neurotoxin Type G

Ph.D. Date: 2002
University of Utah

GARRUS, JENNIFER E
Citizenship: United States
Adviser: Dr. Sina Bavari
Research Field: Virology
Research Title: Late Domain Mediated Filovirus Budding

Ph.D. Date: 2002
University of Utah

MARIANS, RUSSELL C
Citizenship: United States
Adviser: Dr. Bradford Powell
Research Field: Bacteriology
Research Title: Characterizing the Immune Response to the F1-V Y.Pestis Vaccine

Ph.D. Date: 2001
Mt Sinai School of Medicine-CUNY

**AMRMC- U.S. Army Medical
Research Institute of Infectious**

AMRMC- U.S. Army Medical Research and Materiel Comm:

Fleming, Sherry D.

1/02/2001 1/01/2003

- 1 Complement inhibitors can prevent local and systemic injury due to mesenteric ischemia/reperfusion (IR).
- 2 The anaphylotoxin C5a is critical for both local and systemic tissue damage.
- 3 The classical complement pathway is activated by natural antibodies in response to IR-induced damage.
- 4 IgM and IgG natural antibodies each contribute unique aspects of the tissue damage.
- 5 The natural antibody repertoire is altered in the absence of complement receptor 2 (CR2).

Nair, Lalitha Punchayil Velayudhan

10/11/2000 10/10/2002

- 1 Worked in the development of the purification of an important malaria vaccine target antigen PfAMA/E that (99% pure) was scaleable and transferable to GMP facility, and that induced high titre growth inhibitory antibodies in rabbits.
- 3 Purification protocol was used in the writing of Batch Production Record BPR-480, entitled "Preparation of a Bulk Lot Recombinant P. falciparum AMA1/E Protein Expressed in Escherichia coli, Origami Strain."
- 5 The data from this analysis will be part of an IND application to the FDA to use this protein as a vaccine in humans.
- 7 Cloned, expressed, purified and immunologically characterized all six subdomain constructs from ectodomain of AMA-1 in bacteria. It enabled to fine map the immunodominant regions of the whole molecule.
- 9 Erythrocyte binding activity of AMA-1 and the subdomain fragments is established from this study. This data may help to develop better AMA-1 based constructs for vaccine study.

Savransky, Vladimir

2/12/2001 2/11/2003

- 1 Developing the new murine intranasal SEB toxic shock model.
- 2 Screening various SEB mutant proteins for superantigenicity, toxicity, and selecting safe mucosal vaccine candidate.

**Summary of
Associate Research**

10/1/2002 - 2/28/2003

Attachment 3

3/26/2003 Page 2 of 2

AMRMC- U.S. Army Medical Research and Materiel Comm:

3 Studying immunogenicity and protective properties of selected candidates.

4 Developing a novel mucosal vaccine against SEB intoxication.

Zhu, Shuren

11/01/1999 10/31/2002

1 A novel class of peptidomimetic antimalarial agents has been discovered.

2 Compounds exhibited potent in vitro and in vivo activity against malarial parasites.

FINAL REPORT

Enter information electronically in Layout view.

Return this form directly to the NRC as an E-mail attachment, or print out and mail or fax.

1) Associate Last or Family Name Fleming		First Name Sherry	M.I. D
2) FORWARDING Address (for tax statement / final stipend check) 11503 Regnid Dr. Silver Spring, MD 20902		FORWARDING Phone(s) and E-Mail (if known) phone: (301) 319-7359 phone: (301) 942-9440 e-mail: sfleming@usuhs.mil	
3) Today's Date		Dates of Tenure from January 2, 2001 to January 1, 2003	
4) Agency AMRMC	Laboratory WRAIR/Tsokos	or NASA Ctr	Division / Branch / Directorate Cellular Injury/MCR
5) NAME OF RESEARCH ADVISER George Tsokos			

6) TITLE OF RESEARCH PROPOSAL

Role of natural antibodies and complement inhibitors in mesenteric ischemia-reperfusion injury

7) SUMMARY OF RESEARCH DURING TENURE Itemize significant findings in concise form, utilizing key concepts/words.

- 1) Complement inhibitors can prevent local and systemic injury due to mesenteric ischemia/reperfusion (IR)
- 2) The anaphylotoxin C5a is critical for both local and systemic tissue damage
- 3) The classical complement pathway is activated by natural antibodies in response to IR-induced damage.
- 4) IgM and IgG natural antibodies each contribute unique aspects of the tissue damage.
- 5) The natural antibody repertoire is altered in the absence of complement receptor 2 (CR2).

8) RESEARCH IN PROGRESS Describe in no more than 100 words.

I am continuing the CR2 studies to determine the antigen for the natural antibody recognition of ischemic tissue. In addition, the cell type that is secreting the natural antibodies and the recruitment of these cells to the local area are being investigating. The C5 project is being extended to determine the actual involvement of integrin $\alpha 4$ and VCAM in local and systemic injury.

9) PUBLICATIONS AND PAPERS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide complete citations: author(s), title, full name of journal, volume number, page number(s), and year of publication.

a) Publications in peer-reviewed journals

Fleming, S.D., Lambris, J.D., T.Shea-Donohue and G.C. Tsokos. 2002. C5 is critical for the mesenteric ischemia/reperfusion-induced local and remote organ injury. 2002. Clinical Immunol. In Press.

Fleming, S.D., T.Shea-Donohue, J.M. Guthridge, L. Kulik, T.J. Waldschmidt, M.G. Gipson, G.C. Tsokos and V.M. Holers. 2002. Mice deficient in complement receptors 1 and 2 lack a tissue injury-inducing subset of the natural antibody repertoire. J. Immunol. 169:2126-2133.

Fleming, S.D., B. Starnes, J.G. Kiang, A. Stojadinovic, G.C. Tsokos, and T.Shea-Donohue. 2002. Heat stress protection against mesenteric ischemia/reperfusion-induced alterations in intestinal mucosa in rats. J. Applied Physiol. 92:2600-2607.

Rehrig, S., S.D. Fleming, J. Anderson, J.M. Guthridge, J. Rakstang, C. McQueen, V.M. Holers, G.C. Tsokos, and T.Shea-Donohue. 2001. Complement inhibitor, Crry-Ig attenuates intestinal damage after the onset of mesenteric ischemia/reperfusion injury in mice. J. Immunol. 167: 5921-5927.

b) Books, book chapters, other publications

Fleming, S.D. and G.C. Tsokos. 2001. Complement Inhibitors in Rheumatic Diseases in Modern therapeutics in Rheumatic Diseases. Pg 443-452. Ed. G.C. Tsokos, Humana Press, Totowa, NJ.

c) Manuscripts in preparation, manuscripts submitted

Karpel-Massler, G., Fleming, S.D., Kirschfink, M., Tsokos, G.C. 2002. Human C1 esterase inhibitor attenuates murine mesenteric ischemia/reperfusion induced local organ injury. Submitted. 2002.

Fleming, S.D., Lambris, J.D., and G. Tsokos. C5a-mediated mesenteric ischemia/reperfusion injury is independent of polymorphonuclear neutrophils.

Fleming, S.D., Anderson, J., Rehrig, S., Wilson, F., .Shea-Donohue, T., and G. Tsokos. Systemic effects of Crry-Ig after mesenteric ischemia/reperfusion.

Anderson, J. Fleming, S.D., Rehrig, S., Tsokos, G., Shea-Donohue, T and M. Basta. Intravenous immunoglobulin attenuates mesenteric ischemia-reperfusion injury

10 *PATENT OR COPYRIGHT APPLICATIONS RESULTING FROM NRC ASSOCIATESHIP RESEARCH*

Provide titles, inventors, and dates of applications.

None

11) *PRESENTATIONS AT SCIENTIFIC MEETINGS OR CONFERENCES*

Provide complete references: author(s), title, abstract/proceeding citation, meeting name and location.

International

International Complement Society Meeting, Palermo, Italy, Sept. 2002. Fleming, SD, Lambris, JD, Shea-Donohue, T, and Tsokos, GC. C5a is responsible for the mesenteric ischemia/reperfusion-induced local and remote organ injury. Poster Preseentation

International Complement Associated Disease, Animal Models and Therapeutic Workshop. Santorini, Greece. 2001. Fleming, SD, Lambris, JD, Shea-Donohue, T. and Tsokos, GC. C5a is responsible for the mesenteric ischemia/reperfusion-induced local and remote organ injury Abstract #20. Oral Presentation.

Domestic

AAATAC meeting, Florida, Sept. 2002, Oral Presentation.

AAATAC meeting, Florida, Sept. 2001

The C5a fragment of C5 is critical of the mesenteric ischemia/reperfusion-induced local and remote organ injury, Fleming, SD, Lambris, JD, Shea-Donohue, T and Tsokos, GC.

FOCIS Meeting, Boston, MA, 2001 Poster Presentation

C5 inhibitors prevent mesenteric ischemia/reperfusion induced injury. by Fleming, SD, Lambris, JD, Shea-Donohue, T. and Tsokos, GC. Clinical Immunology 99:175 Abstract #221.

12) *SEMINARS OR LECTURES DELIVERED AT UNIVERSITIES AND/OR INSTITUTES* Include dates, names and locations of seminars.

Research seminar. Dept. Pathology and Laboratory Medicine, Univ. Penn, Philadelphia, PA. March 2002

Immunology section, 4 lectures, Structure and Function of Organ Systems, Uniformed Services University of the Health Sciences, Bethesda, MD April 2002.

13) *PROFESSIONAL AWARDS RECEIVED DURING TENURE*

None

14) *POST-TENURE POSITION TITLE*

CRM Investigator

15) *POST-TENURE ORGANIZATION* Provide name and city of organization.

Clinical Research Management
Silver Spring, MD 20910

16) *POST-TENURE POSITION STATUS / CATEGORY* Please indicate only one.

National Research Council Associateship Programs

FINAL REPORT

Enter information electronically in Layout view.

Return this form directly to the NRC as an E-mail attachment, or print out and mail or fax.

1) Associate Last or Family Name		First Name	M.I.
Nair		Lalitha	PV
2) FORWARDING Address (to which your tax statement will be mailed)		FORWARDING Phone(s) and E-Mail (if known)	
F 62, CSIR Scientist Apartment, Maharani Bagh, New Delhi 110065, India		Phone: 91-11-6917555 Phone: 91-11-6325129 E-mail: Lalithapv@hotmail.com	
3) Today's Date		Dates of Tenure	
September 24, 2002		from October 11, 2000 to October 10, 2002	
4) Agency	Laboratory or NASA Center	Division / Branch / Directorate	
AMRMC	WRAIR	CD & I, Immunology	

5) NAME OF RESEARCH ADVISER

David E Lanar

6) TITLE OF RESEARCH PROPOSAL

Cloning, Expression and Immunological Characterization of AMA-1 and its Subdomain Fragments in Bacteria

7) SUMMARY OF RESEARCH DURING TENURE Itemize significant findings in concise form, utilizing key concepts/words.

- 1) Worked in the development of the purification of an important malaria vaccine target antigen PfAMA1/E that (99% pure) was scaleable and transferable to GMP facility, and that induced high titre growth inhibitory antibodies in rabbits.
- 2) Purification protocol was used in the writing of Batch Production Record BPR-480, entitled "Preparation of a Bulk Lot Recombinant P. falciparum AMA1/E Protein Expressed in Escherichia coli, Origami Strain.
- 3) The data from this analysis will be part of an IND application to the FDA to use this protein as a vaccine in humans.
- 4) Cloned, expressed, purified and immunologically characterized all six subdomain constructs from ectodomain of AMA-1 in bacteria. It enabled to fine map the immunodominant regions of the whole molecule.
- 5) Erythrocyte binding activity of AMA-1 and the subdomain fragments is established from this study. These data may help to develop better AMA-1 based constructs for vaccine study.

8) RESEARCH IN PROGRESS Describe in no more than 100 words.

Cloned and expressed all the six subdomain fragments of AMA-1 ectodomain in bacteria, purified in order to fine map the immune responses. The purified double domains have generated high titre antibodies in rabbits that recognized the native parasite in IFA and recognized the parasite AMA-1 in Western blot experiments. Domain I+II generated most of the growth inhibitory antibodies on a growth inhibition/invasion assay in vitro, suggesting that this region is most important in AMA-1 ectodomain. Also, most of the immune responses towards the ectodomain are localized in the domain II, though this region alone is not enough to generate inhibitory antibodies. AMA-1 and all six subdomains, I+II, II+III, I+III, I, II and III have shown to have erythrocyte binding activity to human RBC. Immunization with single domains is being done. Projects on D I+II crystal structure elucidation and mapping of monoclonal antibodies are also in progress, in collaboration.

9) PUBLICATIONS AND PAPERS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide complete citations: author(s), title, full name of journal, volume number, page number(s), and year of publication.

a) Publications in peer-reviewed journals

1. Purification and characterisation of the refolded ectodomain of the Apical Membrane Antigen-1 of Plasmodium falciparum expressed in Escherichia coli. S Dutta, P V Lalitha, L A Ware, A Barbosa, JK Moth, MA Vassel, S Kitov, N Kolodny, J D Haynes and D E Lanar, Infection and Immunity, 2002, 70(6), 3001-10.

b) Books, book chapters, other publications

c) Manuscripts in preparation, manuscripts submitted

1. Lalitha PV, Ware LA, Barbosa A, Dutta S, Moch K, Haynes JD, Lanar DE. Protective antibody responses to AMA-1 is directed towards D I+II: Results from Analysis of Cloning, expression, purification and immunological characterisation of refolded Plasmodium falciparum AMA-1 Subdomain fragments in E. coli.

10 *PATENT OR COPYRIGHT APPLICATIONS RESULTING FROM NRC ASSOCIATESHIP RESEARCH*

Provide titles, inventors, and dates of applications.

1. Process for purification of recombinant Plasmodium falciparum AMA-1 from E. coli . D E Lanar, S Dutta, L A Ware and Lalitha P V. Filed a Provisional U.S. Patent Application, filing date: March 26, 2001.

11) *PRESENTATIONS AT SCIENTIFIC MEETINGS OR CONFERENCES*

Provide complete references: author(s), title, abstract/proceeding citation, meeting name and location.

International

1. Barbosa A, Wood CL, Lalitha PV, Tighe JJ, Ware LA, Dutta S, Haynes JD, Moch JK, Bowden RA, Lanar DE, Heppner DG, Kellerman SA, Green LL, Production of Human Monoclonal Antibodies to the Plasmodium falciparum AMA-1 Protein, Paper to be presented at 51st ASTM Meeting to be held at Denver, CO, USA during 10-14 Nov 2002.
2. Haynes JD, Lanar DE, Dutta S, Lalitha PV, Barbosa A, Darko CA, Angov E, Lyon JA, Narum DL, Sim BKL, Moch JK, Malaria Growth Inhibition Assays (GIA) in Vaccine Candidate Evaluation: Roles of Suspension GIA and Reversal of Inhibition by Antigen, Paper to be presented at 51st ASTM Meeting to be held at Denver, CO, USA during 10-14 Nov 2002.
3. Cloning, Expression, Purification and Immunogenicity of Refolded Regions of Plasmodium falciparum AMA-1 Ectodomain in E. coli, Lalitha PV, Ware LA, Barbosa A, Dutta S, Moch JK, Vassell M, Haynes JD, and Lanar DE, Paper to be presented at 16th Annual Symposium of the Protein Society to be held in August 17-21, 2002 San Diego, California.
4. Lalitha PV, Ware LA, Barbosa A, Dutta S, Moch K, Vassel M Haynes JD, Lanar DE. Immunological characterisation of bacterially expressed Plasmodium falciparum AMA-1 Subdomain fragments. Proceedings of Keystone Symposia, Keystone, Colorado, USA, 3-8 March, 2002.
5. Dutta S, Barbosa A, Ware LA, Fileta BB, Lalitha PV, Moch JK, Vassell MA, Haynes JD, Lanar DE. Biophysical, biochemical and immunological comparison of a refolded malaria vaccine candidate Pf AMA-1/E, produced under GMP environment in two bacterial hosts. Proceedings of "Experimental Biology- Translating the Genome" during April 20-24, 2002, New Orleans, Louisiana, USA.
6. Lalitha PV, Ware LA, Moch K, Haynes JD, Dutta S, Barbosa A, Lanar DE. Expression, purification and immunological analysis of plasmodium falciparum ama-1 subdomains in bacteria, Proceedings of 50th ASTM Annual Meeting, Atlanta, Georgia, USA during 11-15, Nov 2001
7. Dutta S, Lalitha PV, Ware LA, Barbosa A, Moch K, Haynes JD, Vassell MR, Lanar DE. Purification and characterization of a refolded plasmodium falciparum apical membrane antigen-1 ectodomain produced under cGMP conditions for clinical use, Proceedings of 50th ASTM Annual Meeting, Atlanta, Georgia, USA during 11-15, Nov 2001.

Domestic

12) *SEMINARS OR LECTURES DELIVERED AT UNIVERSITIES AND/OR INSTITUTES* Include dates, names and locations of seminars.

1. Cloning, Expression and Immunological Characterization of Apical Membrane Antigen (AMA-1) Subdomain Fragments from P. falciparum, Immunology Department, CD&I, Walter Reed Army Institute of Research, on 11 September 2002.
2. Cloning, Expression and Immunological Studies of Apical Membrane Antigen (AMA-1) and its Subdomain Fragments from P. falciparum, Seminar during NRC Meeting at WRAIR during April 2002

13) *PROFESSIONAL AWARDS RECEIVED DURING TENURE*

Young Scientist Project, Department of Science and Technology, New Delhi, India for a Project entitled Structural and functional characterisation of some important malarial blood stage vaccine target antigens from Plasmodium falciparum Indian isolates.

14) *NEW POSITION TITLE*

Research Scientist

15) *NEW POSITION ORGANIZATION* Provide name and address of organization.

Tentatively-Department of Science and Technology, New Delhi (Sponsors); Exact laboratory is to be decided in two months.

16) *NEW POSITION STATUS / CATEGORY* Please indicate only one.

17) *APPRAISAL OF THE ASSOCIATESHIP PROGRAM* Please rate each of the following on a scale of 1 (poor) to 10 (excellent).

Your experience as a NRC Research Associate in this federal Laboratory

7 Short-term value: development of knowledge, skills, and research productivity

Comments:

I had the freedom to choose my project, plan and execute the way I wanted; hard work and earlier experience in this field helped me a lot to be very productive.

8 Long-term value: how your NRC Associateship award affected your career to date

Comments:

It was really a good exposure, it helped me to get more confidence in my abilities to do research. I could collaborate with some other projects/ laboratories such as Crystal structure elucidation of D I+II of AMA-1(BSI Proteomics Corporation, Gaithersburg, MD), Mapping of human monoclonal antibodies (Arnoldo Borbosa, WRAIR ; Medarex Corporation etc.) These experiences certainly helped me to improve my skills and will help to work more effectively on my return to India.

Administrative Support

8 Quality of the support you received from the federal Laboratory

9 Quality of the support you received from the NRC staff

Comments:

I am extremely thankful for the liberal support I received from NRC staff both from my Institute (Dr Sara Rothman's office) and also from Washington DC office. I never had any difficulty in finding solutions to my tiny problems.

- 2) Compounds exhibited potent in vitro and in vivo activity against malarial parasites.
- 3)
- 4)
- 5)

8) RESEARCH IN PROGRESS Describe in no more than 100 words.

A novel class of peptidomimetic antimalarial agents has been discovered. The core structure of these compounds consists of a substituted 5-aminopyrimidone ring and a Michael acceptor side chain. These compounds exhibited potent in vitro growth inhibitory activity against both chloroquine sensitive (D-6) and chloroquine resistant (W-2) Plasmodium falciparum clones. This class of compounds exhibited weak to insignificant in vitro cytotoxicity against neuronal, macrophage, and colon cell lines. A scale-up synthesis has also been performed, gram quantities of these compounds has been made available for in vivo anti-malarial studies. Some selected compounds exhibited in vivo antimalarial activity at 40-160 mg/kg dosages.
